Use Water Wisely

Groton Utilities Water Division reminds its water customers that using water wisely is always in season. This summer has been especially hot, and it is easy to lapse into wastefully water use practices and habits. While our water supply is more than adequate for this time of year, we do recommend that you exercise common sense when using water.

There are many ways to use water wisely. We would like to offer you some examples of wise water usage:

- Turning off the tap while you brush your teeth can save 8 gallons per day.
- Wash only full loads of dishes and clothes or lower the water settings for smaller loads.
- Water your lawn or garden during the cool morning hours, as opposed to midday, to reduce evaporation.
- Try not to overwater your landscaping. Learn plants' water needs and water different types appropriately.
- A full bathtub can require up to 70 gallons of water, while taking a 5-minute shower uses only 10 to 25 gallons.

You can view long term water conservation tips at Water Conservation Tips.

Conservation Programs

In August 2005, the Connecticut Legislature enacted a comprehensive energy bill (Governor Rell signed into law) in response to rising energy prices and serious constraints in Connecticut's electric transmission and distribution systems. As part of the law, Connecticut municipal electric utilities, including Groton Utilities, are required to offer rebates and incentives to its electricity customers who implement energy saving measures in their homes and businesses. Groton Utilities' energy conservation program(s), rebates and incentives become effective January 1st, 2006.

Groton Utilities, effective January 1st, 2006, is mandated to collect incentive funds from its customers through a surcharge of 1 mil per kilo-watt hour billed on customer's monthly electric bill. These funds are used to provide cash incentives to Groton Utilities' energy consumers that invest in energy saving equipment and retrofits. Those participating customers who conserve electricity by making energy conscious investments help to reduce all Groton Utilities' customer energy costs by reducing electricity demand during peak summer and winter periods.

Groton Utilities offers a variety of innovative programs designed to help home and business customers reduce and proactively manage their energy costs. Groton Utilities' current programs are easy to use and provide cash incentives that cover a portion of the total project cost.

- Residential Programs
- Commercial Programs
- Proper disposal and handling of CFL Bulbs
- Window Air Conditioner Rebates

Residential Conservation Programs

Groton Utilities offers residential customers a variety of energy conservation programs to help reduce energy costs. These programs are designed to help residential users reduce their energy costs by installing more energy efficient lighting, air conditioning, and household appliances.

- Lighting Program
- Air Conditioner / Heat Pump Program
- Appliance Rebate Program
- Demand Response Programs
- Home Energy Savings Program

Residential Air Conditioning/Heat Pump Program

Groton Utilities residential air conditioning/heat pump program provides cash incentives for new or replacement energy efficient air conditioners and heat pumps that meet high efficiency standards.

Obtaining these cash incentives is easy and simple with Groton Utilities simple to follow rebate application forms. For a simple "how-to obtain" available residential air conditioning rebates follow the steps as outlined in the "Program Process" below.

Removable window installed room air conditioners are not included in this program. Please refer to the Appliance Rebate Program.

Eligibility Requirements:

All Residential electric customers of Groton Utilities and Bozrah Light & Power.

Program Process:
Due to possible funding constraints, all rebate applications must be pre-approved before purchasing any equipment.

1. Review eligibility requirements to ensure that all requirements can be met.
2. Customer purchases qualifying air conditioning/heat pump equipment. Qualifying equipment is installed. *(Demand Side Management: Groton Utilities reserves the right to install demand side management equipment on all HVAC equipment that receive a rebate.)*
3. Customer completes the Rebate Application, includes proof of purchase and sends to Groton Utilities for approval.

Residential Conservation Programs

Groton Utilities offers residential customers a variety of energy conservation programs to help reduce energy costs. These programs are designed to help residential users reduce their energy costs by installing more energy efficient lighting, air conditioning, and household appliances.

- Lighting Program
- Air Conditioner / Heat Pump Program
- Appliance Rebate Program
- Demand Response Programs
- Home Energy Savings Program

Resident Home Energy Savings Program

Groton Utilities residential Home Energy Savings Program, subsidized in part by a State of Connecticut grant, provides a comprehensive in-home energy assessment service for your dwelling which may include the following services:

Air Sealing to prevent drafts and leaks in the house Duct testing and sealing Installation of low-flow showerheads and faucet aerators to save water Rebates for replacement of certain inefficient appliances with qualifying energy-efficient models Installation of energy-efficient compact florescent light bulbs and Incentives for insulation upgrades

Obtaining this service is easy and simple by calling Groton Utilities contractor Competitive Resources Corporation (CRI) to arrange an in-home appointment convenient to you, call toll-free 1-888-403-3500

Eligibility Requirements:
All Residential electric customers of Groton Utilities and Bozrah Light & Power are entitled to this service, cost dependant on the dwelling's heat energy source.

Program Process:

1. Read attached letter dependant your type of dwelling heat: propane, oil, or electric.
2. Call Competitive Resources Corporation CRI to arrange an in home appointment toll-free at 1.888.403.3500.
3. CRI assesses your dwellings energy use, installs conservation devices, and explains additional energy conservation incentives you may be entitled to.
4. CRI arranges additional energy conservation incentives if appropriate.
5. Installation is completed at the Customer's residence.

INITIATIVE REQUIREMENTS

Application Offer: This Initiative covers products purchased on or after January 1, 2011. Details of this Initiative, including Rebate levels, are subject to change or cancellation without prior notice. This application form with required documentation must be received by December 31, 2012. Call 888-606-9787 for additional Initiative details.

Completed and signed applications must be submitted within 30 days of the equipment installation to be eligible for Rebates.

Eligibility: Rebates are available to residential, industrial, commercial, institutional and agricultural electric services customers. Equipment must be installed in the service territory of the participating municipal electric utility. Eligible systems are: electric heat pumps, single packaged units, split systems (split systems must meet ARI specifications) and dual enthalpy economizer controls when installed with new, qualifying equipment.

Proof of Purchase: An invoice itemizing the purchased equipment must accompany each Rebate application form. **The invoice copy must indicate the equipment type, size, make and model, serial number of the system and date of purchase**.

Application Form: This application must be filled out completely, truthfully and accurately. An authorized representative of the customer must sign, date, and submit the application along with the invoice, and manufacturer's equipment performance sheet stating the ARI certified efficiency rating and nominal capacity.

Payment: Please allow six to eight weeks for payment. Payment process may take longer if information is missing on application. Call 888-606-9787 for details.

Approval and Verification: Pre-approval from your participating municipal electric utility will be required if the Rebate total is greater than $5,000. Your participating municipal electric utility reserves the right to verify sales transactions and to have reasonable access to your facility, to inspect the HVAC system installed under this Initiative, prior to issuing Rebates, or at a later time.

Endorsement: Your participating municipal electric utility does not endorse any particular manufacturer, product or system design in promoting this Initiative.

Tax Liability: Your participating municipal electric utility will not be responsible for any tax liability that may be imposed on the customer as a result of the payment of Rebates. All customers must supply their Federal Tax Identification number or Social Security number and a completed and signed W-9 form in order to receive a Rebate.

Warranties: YOUR PARTICIPATING MUNICIPAL ELECTRIC UTILITY DOES NOT WARRANT THE PERFORMANCE OF INSTALLED EQUIPMENT, EXPRESSLY OR IMPLICITLY. The participating municipal utility makes no warranties or representation of any kind, whether statutory, expressed or implied, including, without limitations, warranties of merchantability or fitness for particular purpose regarding the unitary HVAC equipment or services provided by a manufacturer or vendor. Contact your contractor for details regarding equipment performance and warranties.

Limitations of Liability: The liability of your participating municipal electric utility is limited to paying the Rebate specified. The participating municipal electric utility is not liable for any consequential or incidental damages or for any damages in tort connected with or resulting from participation in this Initiative.

Assignment: The customer may assign the Rebate payment to a qualified contractor.

Specific Requirements: These include, but are not limited to: payment options, Rebate restrictions for facilities using self-generation for non-emergency purposes. Please call 888-606-9787 for additional details.

Owner's Certification: Owner certifies that he/she has purchased and installed the equipment listed above at the defined location. Owner agrees that all information is true and that he/she conformed to all Initiative and Eligibility requirements listed. Owner has verified that the units listed above have been installed correctly. There are no unusual noises or vibrations and all controls have been calibrated. Owner or owner's representative has been instructed on how to operate and maintain this equipment and has received all the necessary operation and maintenance manuals. Owner has verified that any applicable air-system and water balancing has been performed.

ISO-NE Capacity Payments: By signing this document, and as a condition for receiving a Rebate pursuant to this program, customer hereby assigns to its participating municipal electric utility, whichever the case may be, all of its rights, title and interest in and to any and all LICAP, ICAP, or any and all other capacity-related credits or payments for which customer may be eligible from ISO-NE or such value associated with the settlement of such LICAP, ICAP, or capacity payments as determined through the ISO-NE LICAP, ICAP, or other such like capacity supply auction or market (or its successors or replacements) for any capacity enrolled with ISO-NE.

Commercial Conservation Programs

Groton Utilities offers business customers a variety of energy conservation programs to help reduce and manage energy costs These programs are designed to help businesses reduce their energy costs by installing more energy efficient lighting, air conditioning, electric motors, and refrigeration solutions.

- Lighting Program
- Air Conditioner / Heat Pump Program
- High Efficiency Motor Replacement Program
- Vending and Door Heater Control Program
- Distributed Generation and On-site Solutions
- Demand Response Programs

Commercial Lighting Program

Groton Utilities lighting efficiency program provides cash incentives for new fixture installation or retrofits of old lighting fixtures to energy efficient systems. Groton Utilities lighting efficiency program also provides rebates for installation of lighting occupancy controls and daylight harvesting and dimming controls.

Two types of qualified lighting projects:

1. New Construction & Major Renovation
   Groton Utilities provides fixed per-unit rebates on eligible lighting components.
2. Existing Lighting System Retrofits
   Groton Utilities provides rebates based on a fixed cents per kilo-watt hour saved.

Obtaining these cash incentives is easy and simple with Groton Utilities simple to follow rebate application forms. For a simple "how-to obtain" available Commercial lighting rebates follow the steps as outlined in the "Program Process" below.
