

# Building an Energy Efficient Community: West Hartford

AEE CT Chapter Meeting

February 11, 2020

Catherine Diviney, Energy Specialist  
[catherine.diviney@westhartfordct.gov](mailto:catherine.diviney@westhartfordct.gov)

# Before we start..

- Pretty basic
- West Hartford example, not “the answer”
- Today’s solutions are not tomorrow’s
- Municipal operations <5% of a town’s energy use
- MUCH more West Hartford could/should be doing

**THAT'S SOOOOO  
LAST DECADE!**

West Hartford		
(Millions)	kWh	CCF
Residential	196	21
Business	172	12
Municipal	18	1
Total	368	33

2018 data, EnergizeCT.com

# My lessons

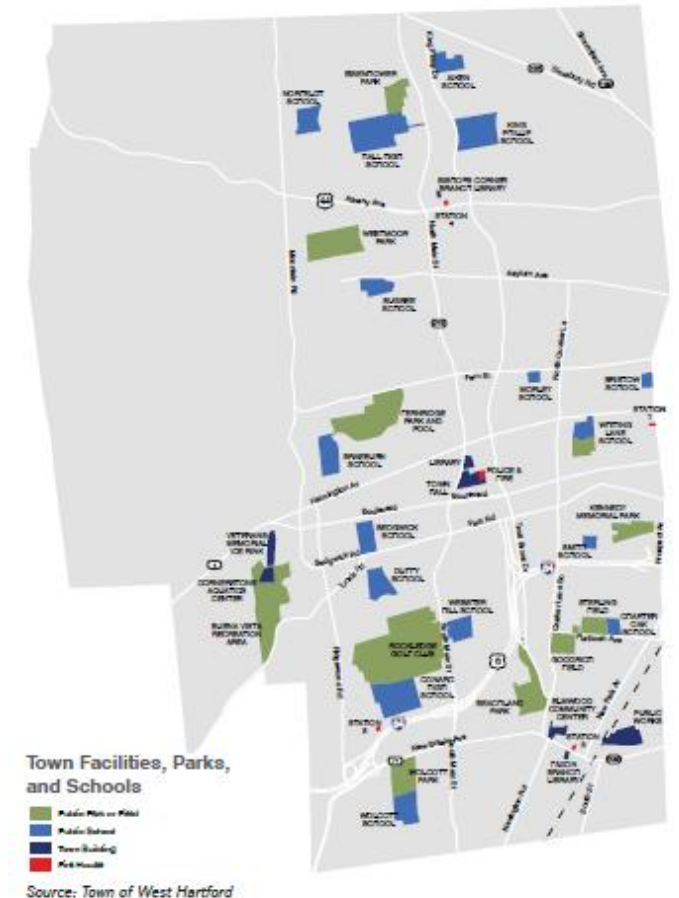

---

- Data speaks – gather it, use it, don't keep it to yourself
- Network – get your name out there
- Figure out what's right for your town, organization
- Have a vision: it won't happen overnight
- Do something!
- Be flexible – ask questions, learn, adjust, improve
- Share

# West Hartford

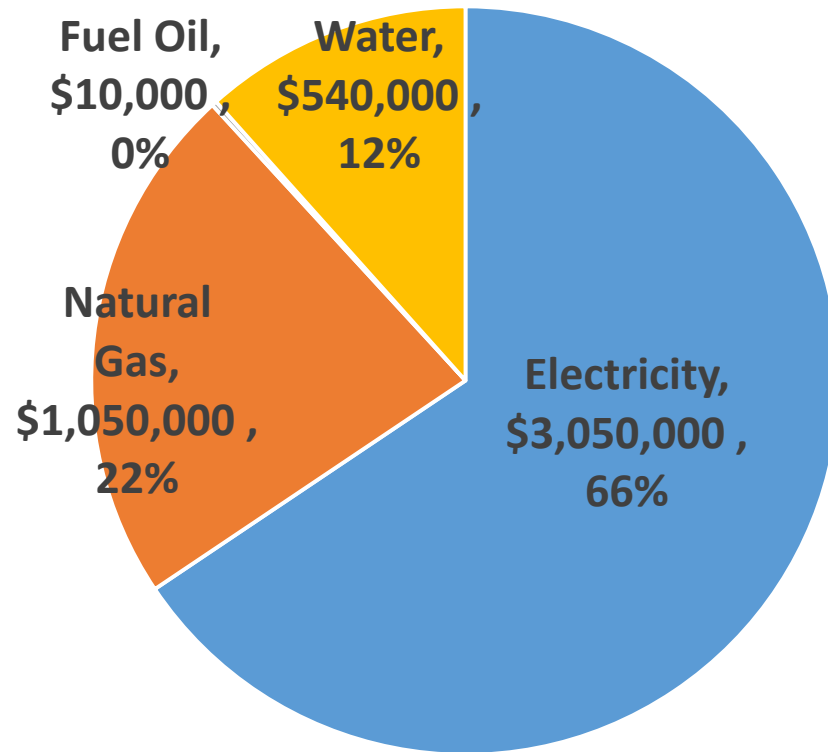

- 63,000 residents
- 22.2 sq miles, 24,000 households, 9,600 students
- 60+ Town and BOE-owned facilities
  - 33 Major – 16 schools, town hall, police HQ, indoor aquatics, indoor ice rink, 5 fire houses, 3 libraries, community center, public works, 2 municipal garages, data hub
  - 30 Miscellaneous – parks, fields, outdoor pools, golf courses, gardens, cemeteries, farm, historic/museum, parking lot, maintenance, grounds
  - 3 million sq ft, most facilities 1950s -60s
- 100+ Traffic Signals and 6,500+ Street Lights

# FY19 expenditures

**\$4.65 Million**

- 300 bills per month
- 3,600 bills per year
- Eversource, CNG, MDC
- Other - Solar PPAs, VNM

# FY19 expenditures

Electricity,  
\$3.05 Million

Natural Gas,  
\$1.05 Million

Water,  
\$0.54 Million

# Energy Specialist since 2011

- Initially, role fulfilled by Director of Plant & Facilities
- Identified as a key action in 2009 Comprehensive Energy Plan
- In 2011, “stars-aligned”
  - Part-time position funded with settlement received from street light overbilling
  - Received my resume
  - Hired

*“We recommend that West Hartford... hire a full-time, in-house town energy manager paid for through energy savings.”*

<https://www.westhartfordct.gov/gov/whgreen/energyplan.asp>

# Energy Specialist job

- In-house, staff position – BOE, Plant & Facilities
- Work for both Town/BOE
- Part-time - 20 hrs/wk, paid hourly, no benefits, flex schedule
- Job description (happy to share)
- Never had to justify “paid for through energy savings”
  - Track data/results
  - Feel position adds value to town (more than just energy savings)
- Town just hired Recycling Coordinator

West Hartford unique.  
Plant & Facilities joint  
for Town/BOE.

# What I do

---

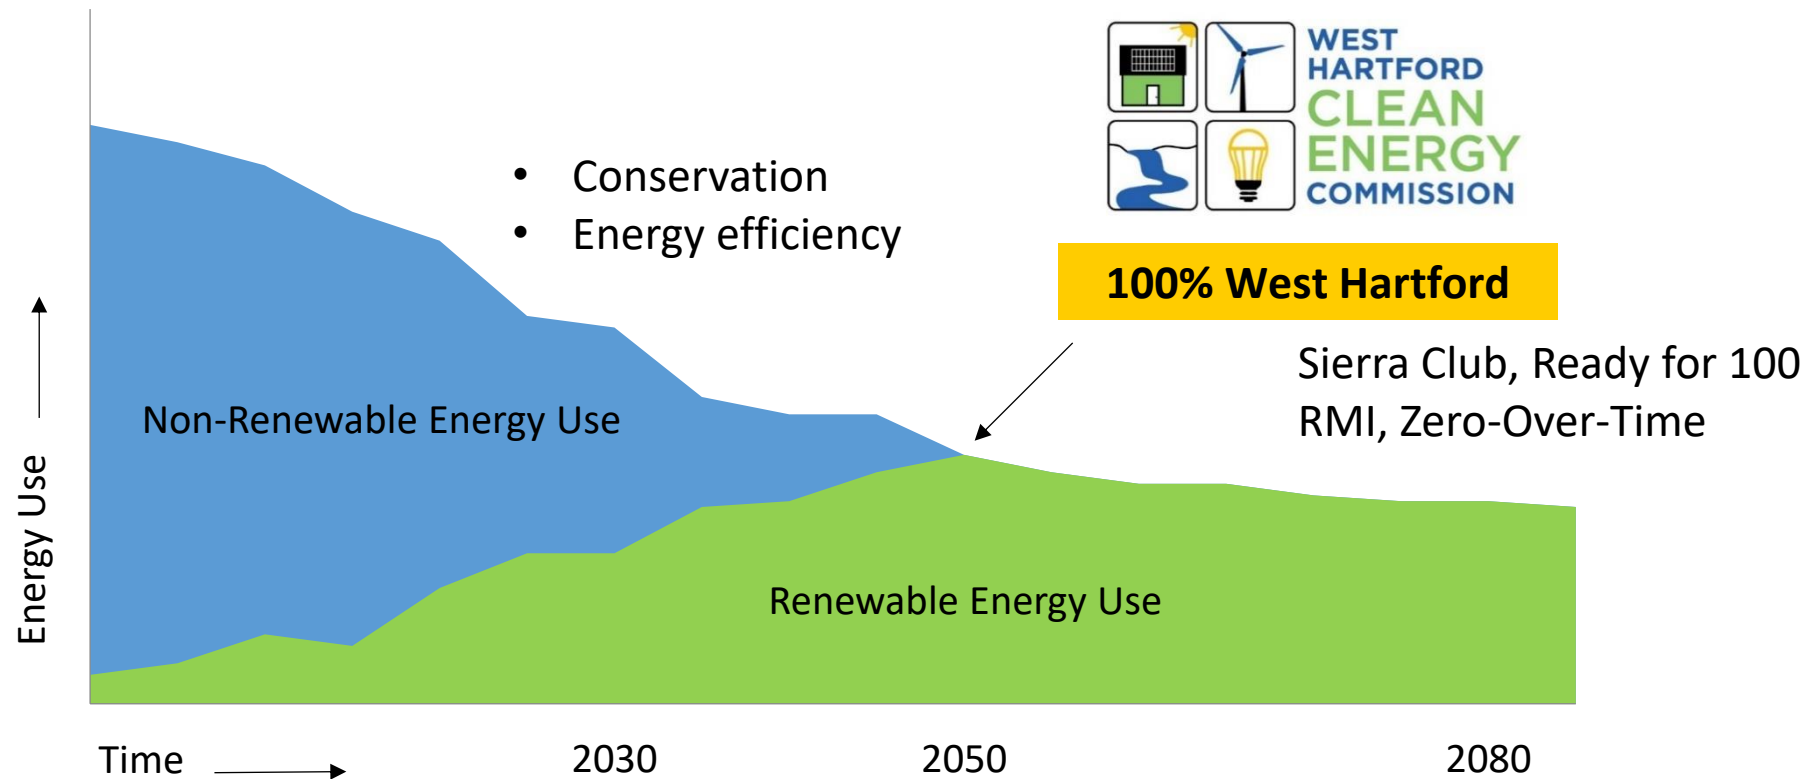

- Track energy use/cost
- Energy Procurement
- Energy Program – education/outreach, resource, advocate
- ➔ • Energy Projects – capital, efficiency, new constr, renewable
- Clean Energy Commission
- Sustainable CT
- Other: water, recycling, food waste, liaison, events, grants, electric vehicle charging stations, water barrels, classroom...

# Clean Energy Commission

- Active since 2005
- Wrote 2009 Energy Plan, 2020 Energy Plan coming...
- Focus on community outreach, events, planning, legislative support
- Collaborate with other Commissions, towns
- Energy Specialist is staff liaison

# Vision – 2020 Energy Plan

# Last 8 years...

Town of West Hartford: Electricity Use

# Solar

- On-Site / Behind the Meter
  - 12 installations since 2009, 2 MW
  - Large ones under PPAs, no cost to town, supply price fixed for 20 years
  - New roofs (capital), before solar
  - Direct, visible, preferred
- Off-Site / Virtual Net Metering
  - 2.4 MW in Thompson, CT
  - \$ credit on West Hartford “host” bill for solar production
  - Indirect, financial transaction

Conard HS, 357 KW

Barrette Farm, 2.4 MW

# Charter Oak Int'l Academy

- Built 2016 to replace 1929 building
- LEED Gold certified
- Design supports IB philosophy
- Energy Use Index in low 30s kBtu/sf (old EUI = 92)
  - 40% larger sq ft
  - More community use

Photo: Perkins-Eastman

# Charter Oak Int'l Academy

- Envelope – insulation, high performance glazing, sunscreens
- Geothermal, 64 heat pumps
- 100 KW solar
- LED lighting/controls
- EMS
- Water efficient fixtures, Native plants, garden
- **Why not net zero?**

# Energy projects – setting the stage

- Flat energy use, EUI = low 70s kBtu/sf
- Improvements where specific projects done, but drop in bucket
- Investment needed to make a dent

Monthly, bill scans, data entry, payment file

Annual, reporting

*If anyone finds the perfect database, let me know!*

# Energy projects – getting going

---

- Hired performance contractor (2013)
- Useful process (2013-14), learned about our facilities and ourselves
  - Audits documented projects/savings
  - Needs across portfolio
  - Capital needs, too large/expensive
  - Projects to implement pretty straightforward
  - WH very “hands-on,” institutional knowledge
  - Did not need “extras” – financing, guarantee, project pitch/presentations
- Decided to manage implementation ourselves (end of 2014)

**DIFFICULT**

**CHEAP**

# Town budget

No separate  
referendum, adopted  
as part of FY16 budget

Usual	FY16 (proposed early 2015)	Actual (still going 2020)
\$100,000 for Energy Conservation Projects	\$4.4 Million <ul style="list-style-type: none"><li>\$3.25M bonds</li><li>\$1.15M revenue, est. 28% utility incentives</li></ul>	\$5.6 Million <ul style="list-style-type: none"><li><b>\$3.25M bonds</b> + \$250,000</li><li>\$2.10M revenue, est. 40% utility incentives</li></ul>
	Phased with incentives being reinvested in projects	Phased with incentives being reinvested in new projects. Higher incentives, lower project cost → more projects
1 or 2 projects	Steam traps, Street Lights (major roads), Exterior LED lighting, Select Interior LED Lighting, Energy Management Systems, Select VFDs & DCV	Steam traps, Street Lights (all roads), Exterior LED lighting, Select Interior LED Lighting, Energy Management Systems, Select VFDs & DCV, Select Motors, Steam traps (w/ insulation jackets), Type B/direct wire LEDT8 & LEDT5
Minor impact	\$500,000 cost savings 15% energy savings Net payback: 6.5 years	\$1,000,000 cost savings 20% energy savings (25% electric) Net payback: 3.5 - 4 years

# Projects – typical

---

- LED street lights
- Steam traps
- Pipe insulation
- Exterior LED / some interior LED (new fixtures)
- Energy management systems
  - Web-based
  - Scheduling/programming
  - Additional buildings, equipment
  - VFDs, DCV, kitchen hoods, motors where applicable
- LEDT8/T5

# Implementation – unique

---

- Self-managed
- Good timing (LED)
- Multiple measures, facilities, years (program)
- Gas and electric measures (comprehensive)
- Multiple contractors
- Worked closely with utilities
  - 38 buildings/LOAs, 113 measures (amended)
  - Very “hands-on,” always looking for additional savings
  - Lower cost, higher incentives reinvested in additional work

# Street Lights 2016-2018

- 6000+ cobra heads
  - Aggressive energy savings, mock-ups, 200 removals
  - 70W, 100W, 150W HPS → 15W, 25W, 32W, 41W LED
  - Started with 4000K, moved to 3000K
- Cost: \$1.75 Million, incl. police and removals
- Net Cost: \$1 Million (>\$175 each), 40% incentive
- Savings: 2 Million kWh, \$250,000, 4.2 yr payback
- Occasional complaints (compliments)
- Still to do – Decorative post-tops, lingering bill discrepancies

Before

After

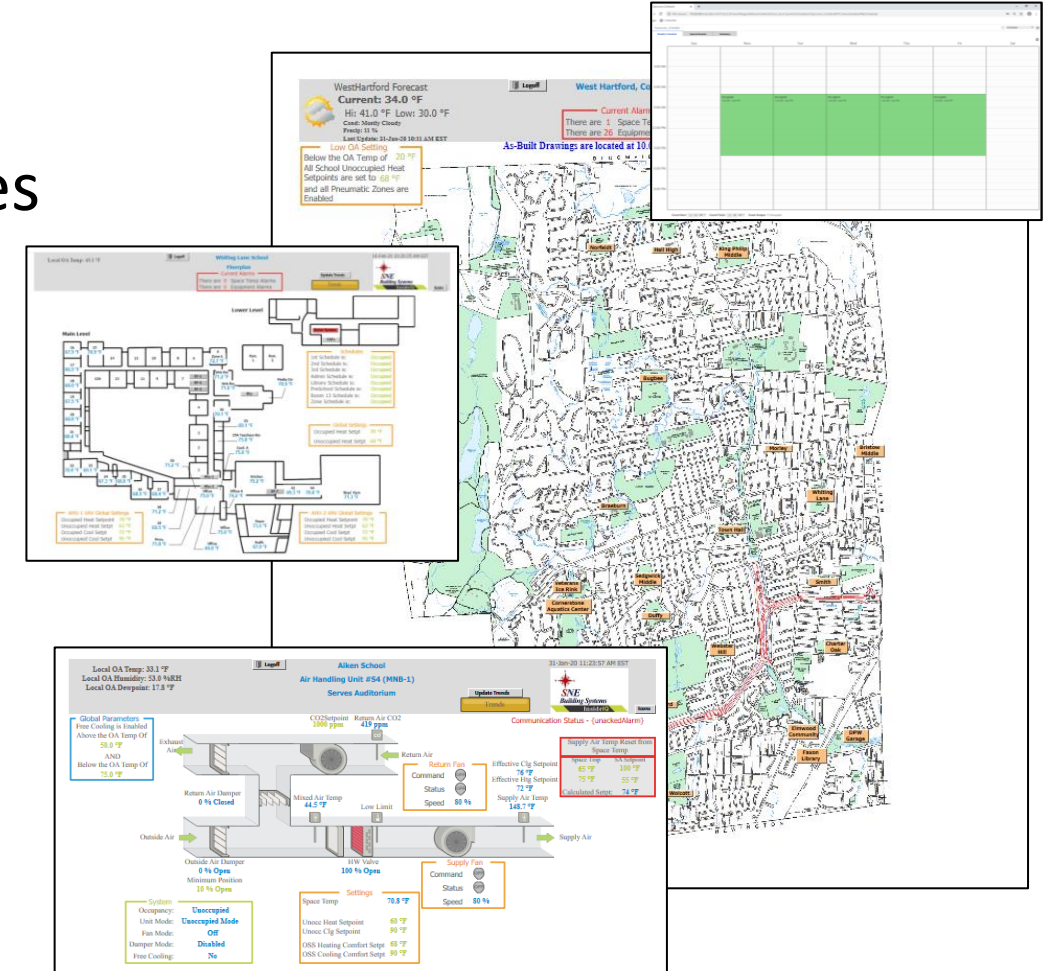

# BMS/EMS 2017-2019

- No system or dial-up modem, DOS-based from 1990s
- Only upgraded as capital budgets allowed
- Some DDC, lots of pneumatics
- 24 buildings
  - Upgraded all to web-based
  - Verified existing and added additional calendars/scheduling, programming – e.g., set-backs, optimal start, economizer, DCV
  - Added additional large equipment, exhaust fans
  - VFDs, DCV/CO2 in strategic spaces
  - Some motors, kitchen hoods

# BMS/EMS 2017-2019

- Cost: \$1.60 Million
- Net cost: \$1.1 Million, 14-40% incentives
- Savings: Hard to isolate
- Additional benefits – equipment functioning, comfort improved, maintenance/troubleshooting, snow day!
- Much more to do – hybrid systems for foreseeable future

# Steam traps 2019

- 7 steam-heated buildings (5 schools)
- Our worst energy users, EUI = 95-100+
- Replace/repair 995 steam traps, some jackets
- Net Cost: \$65,000, incl. survey at 100%
- Savings: look promising
- Long term – covert to hot water or heat pumps (King Philip MS, 2020)

	July-Dec		
	FY13-19	FY20	%Δ
CCF	180,100	175,739	-2.4%
HDD	1,941	2,138	10.1%
CCF/HDD	92.8	82.2	-11.4%

# Lighting 2016-ongoing

- Fortunate on timing (LEDs)
- Hands-on approach
  - Used audits, walked schools ourselves
  - Mockups, “scouting” led to standardized fixtures, wattages
  - Handled incentive paperwork ourselves; Eversource helped streamlined process
  - Multiple contractors – in-house, bid, on-call
  - Inspections and close out directly with Eversource
- Ongoing...

DLC-Listed?  
20W vs 10W

Type B LEDT8  
No ballasts

# Impact

- Energy efficiency works
  - Portfolio EUI 73 → 64
  - Smith ES EUI 79 → 65
  - Town Hall EUI 50 → 36
- Significant maintenance benefits
- West Hartford FY21 utility budget down for the 1<sup>st</sup> time in 5 yrs – savings have finally outstripped rate increases

Smith ES

Town Hall

West Hartford Utility Budget

# To do list

- Real time data / demand management
- Additional projects – bond or \$1M on-bill financing
- More lighting (controls), EMS (economizers), EE capital projects
- Water conservation
- More regular outreach / reporting – website, social media, in-person
- Collaborate with Recycling coordinator, custodians, green teams
- Night audits
- Town v Town energy competition
- School presentations
- Find the perfect utility database
- Sustainable CT – Silver certification, 2020
- Finish 2020 Energy Plan
- Energy campaign (low-income, businesses)
- Higher profile w/ Town Council
